Education

McMaster University, Honour's Computer Science – BS in Applied Science

Sept 2023 – Apr 2027

- **GPA: 3.9/4.0 – 2x Dean's List Student**
- **Relevant Coursework:** Intro to Software Engineering, Databases, Data Structures & Algorithms, Agile Methodologies, Computer Networks & Security, Algorithms & Complexity, Concurrent Systems, Computer Architecture, Operating Systems

Technical Skills

Languages: Java, Python, C#, C, JavaScript, TypeScript, SQL, CSS

Frameworks: .NET Core, Node.js, React.js, Next.js, Angular, Django, Spring Boot, PostgreSQL, MongoDB, Flutter, TailwindCSS

Technologies: Cursor, Visual Studio, Claude Code, Conductor, Postman, Jira, Confluence, Git, GitHub, Bitbucket, Docker, LangChain, LangGraph, PowerBI, MS Office

Experience

Software Engineer Intern, Scotiabank

May 2026 – Sep 2026

TypeScript, Python, SQL, Node.js, React.js, LangGraph, LangChain, BitBucket, Docker, Git, REST API Development, Agile Methodologies

- Building an elevated onboarding experience for a **client-facing platform with a user base in the millions** as the only intern staffed on this high-priority initiative.
- **Led a 6-person intern team** building **agentic workflows and RAG pipelines with LangGraph** to streamline architecture workflows for internal engineering teams using **extreme programming (XP) frameworks**.

Product Management Intern, Scotiabank

Jan 2026 – Apr 2026

UX Strategy, Funnel Analysis, Data-Driven Decision Making, Cross-Functional Collaboration, Stakeholder Communication

- Leading end-to-end UX improvements across **Two-Step Verification (2SV)** authentication flows to reduce friction while maintaining security and compliance standards
- Partnering cross-functionally with **Design, Engineering, Risk, and Compliance** to translate user pain points into feasible product solutions, navigating legacy system constraints and high-risk identity surfaces

Software Engineer and Business Analyst Intern, Tetra Tech

May 2025 – Dec 2025

JavaScript, TypeScript, C#, Python, SQL, Node.js, React.js, ASP.NET, Automated Testing, REST APIs, Full-Stack Development, System Design

- Developed an end-to-end Excel automation full-stack web application using **ReactJS and C#**, enabling teams to drag-and-drop inputs and automatically **generate client-ready deliverables, streamlining tasks by 90%**.
- Built and documented **5+ reusable React components** using Storybook, **improving UI development efficiency by over 25%** and cutting new developer onboarding time by **2+ hours per project**.
- Built an API integration application to **retrieve 10,000+ client feedback comments** from Autodesk Construction Cloud and developed a PowerBI dashboard with scheduled refreshes, enhancing real-time visibility **across 20+ active projects**.
- Collaborating cross-functionally with engineers, project managers, and stakeholders to **gather requirements and translate business needs into technical deliverables**.

Software Engineer Intern, InsightAI

Aug 2024 – Dec 2024

Python, JavaScript, React.js, Node.js, Django, pytest, OpenAI API, Retrieval-Augmented Generation (RAG), Data Processing Pipelines

- Refactored client AI knowledge base updates on the InsightAI platform by developing a **RAG application** that processes conversational data **reducing manual update effort by 70%**.

Projects

Chalk – Pool Hall Management SaaS

Apr 2026 – Present

- Building a **multi-tenant B2B SaaS** from scratch using **Next.js, TypeScript, Tailwind CSS, and Supabase Postgres**, shipping a working product to a real pilot customer in under a week
- Designed real-time **table session tracking** (start/stop, live timers, auto revenue calculation) optimized for tablet-first in-venue use; built an owner-facing **analytics dashboard** with peak-hour analysis and rate-tier breakdowns

Signal – Daily News Automation

March 2026

- Built a background **Python agent** that scrapes news from NewsAPI, RSS feeds, and the Claude API's web search tool, delivering a **categorized HTML email digest** on a configurable schedule

Macify – Job Search Platform

Jan 2026 – Present

- Building a **context-aware Chrome extension** providing fast access and guided navigation across McMaster systems.
